PERSONAL PROFILE

Software developer with an MSc in Cloud Computing (Distinction), a BSc in Information Technology and professional experience building and releasing Android, desktop and client software in Java and Python. Comfortable across the full journey: understanding a client's problem, building the solution, testing it and handing it over. Hands-on with PostgreSQL and MySQL, REST APIs, Git, Docker and Linux, and active on Stack Overflow answering Android and Java questions. An enthusiastic learner in artificial intelligence, with university study in AI and machine learning and ongoing study in generative AI and ethical AI. Open to relocating to any country.

KEY SKILLS

Development

- Java, Python and object-oriented programming
- Android development (Android Studio, Firebase)
- REST APIs and Google Sign-In integration
- PostgreSQL, MySQL and SQLite
- Testing, debugging and automation (Selenium)

Cloud, AI & Tools

- AWS, Microsoft Azure and Google Cloud (academic)
- AI and machine learning fundamentals (MATLAB)
- Git, GitHub, Docker and Linux
- Networking and security (Wireshark, Nmap)
- UI/UX design fundamentals

PROFESSIONAL EXPERIENCE

Software Developer | Made Tech IT Ltd Oct 2024 – Present | UK

- Build software solutions for clients in Java and Python, from understanding the business problem to delivery and handover.
- Work with PostgreSQL and SQL databases, and integrate REST APIs and third-party services.
- Use Git for version control and Docker for consistent development on Linux; test and debug before release.
- Guide clients through requirements, priorities and progress, and document solutions so they can be maintained.

Android Developer | CodeCreator Technologies Aug 2020 – Nov 2022 | India

- Built and maintained native Android and desktop applications in Java from client requirements through to release.
- Integrated REST APIs, Firebase and Google Sign-In, and managed releases on the Google Play Store.
- Tested releases, fixed user-reported bugs and monitored apps after launch, working with designers in iterative release cycles.

PROJECTS

WhatsApp Messaging Automation Tool | Java, Selenium, SQLite Freelance

- Built a desktop application for a small-business client that automated around 90% of their manual customer messaging work.

EDUCATION

MSc Cloud Computing (Distinction) | University of East London 2022 – 2023 | United Kingdom

Cloud architecture and services (AWS, Microsoft Azure), artificial intelligence and machine learning, distributed systems and virtualisation, network security, database systems

BSc Information Technology | Ganpat University Completed 2020 | India

Modules included System Analysis and Design, Databases, Computer Networks, Web Design and Android Development

CERTIFICATIONS

Object-Oriented Programming in Java | Cloud Foundations | Ethical Hacking

Introduction to UI/UX Design | GitHub

Building and Implementing Ethical AI, Certified Institute for Technology and AI (in progress)

ADDITIONAL INFORMATION

Languages: English, Hindi | **Driving licence:** Full UK (Class B)

Work authorisation: open to relocate; will require visa sponsorship or a work permit where needed
