

# VATSAL DHOLAKIYA

Software Engineer

London, United Kingdom | Happy to relocate to the Netherlands

+44 7436 676634 | vatsal.dholakiya2000@gmail.com

## PERSONAL PROFILE

Software engineer with an MSc in Cloud Computing, a BSc in Information Technology and professional experience building and releasing software in Java. Strong in object-oriented programming, with hands-on use of PostgreSQL and SQL databases, REST APIs, Git, Docker and Linux. I take a product mindset: I start from the business problem, then build the technical solution that solves it, as when I delivered an automation tool that removed around 90% of a client's manual messaging work. Looking to grow as a back-end engineer in the Netherlands, building on my Java foundation with Spring and message-driven systems.

## KEY SKILLS

### Back-End & Data

- Java and object-oriented programming
- PostgreSQL, SQL and SQLite databases
- REST APIs and service integration
- Python
- Testing and debugging

### Tools & Ways of Working

- Git version control
- Docker containers
- Linux, Windows Server
- AWS and Google Cloud fundamentals
- Product mindset: business problem first

## PROFESSIONAL EXPERIENCE

### Software Developer | Made Tech IT Ltd Oct 2024 - Present | UK

- Develop software solutions for clients in Java and Python, from understanding the business problem to delivery.
- Design and work with PostgreSQL and SQL databases, and integrate REST APIs and third-party services.
- Use Git for version control and Docker for consistent development and deployment on Linux.
- Test and debug code, and document solutions so they can be maintained and handed over.
- Work directly with clients to gather requirements, agree priorities and report progress.

### Android Developer | CodeCreator Technologies Aug 2020 - Nov 2022 | India

- Built and maintained native Android and desktop applications in Java, from client requirements through to release.
- Integrated REST APIs and back-end services, and managed releases on the Google Play Store.
- Used Git for version control and collaborated with designers and developers in iterative release cycles.
- Tested releases before deployment, investigated user-reported bugs and monitored apps after launch.

## PROJECTS

### WhatsApp Messaging Automation Tool | Java, Selenium, SQLite Freelance

- Identified a small-business client's costly manual messaging process and owned the solution from requirements to release.
- Built a Java desktop application with Selenium and an SQLite database that automated around 90% of the manual work.

## EDUCATION

### MSc Cloud Computing | University of East London 2023 - 2024 | United Kingdom

Cloud architecture and services, distributed systems and virtualisation, network security, database systems

### BSc Information Technology | Ganpat University Completed 2020 | India

Modules included System Analysis and Design, Databases, Computer Networks, Web Design and Android Development

## CERTIFICATIONS

Object-Oriented Programming in Java | Cloud Foundations | Ethical Hacking

## ADDITIONAL INFORMATION

**Languages:** English, Hindi | **Driving licence:** Full UK (Class B)

**Work authorisation:** would require a Highly Skilled Migrant permit; available to relocate at short notice
